## NextGen Healthcare® Solutions

### *An Implementation Service*

NextGen Healthcare's suite of applications provides a framework for ambulatory clinics, physician practices, and other healthcare organizations to improve operational efficiency, workflow, profitability and electronic documentation of patient care. NextGen Practice Management® automates business processes from front-end scheduling and registration to collections and payment processing. NextGen Ambulatory Electronic Health Records® support clinical templates for more than 26 specialties and workflow that is scalable for single physician or small group practices up to large, multi-specialty organizations. Santa Rosa Consulting's team of NextGen industry talent assists our clients in implementing all components of the NextGen application portfolio. Thus optimizing its use in the practice environment to help achieve meaningful use criteria and maximizing return on investment.

As a Certified NextGen Consulting Partner, the Santa Rosa NextGen Team is comprised of highly qualified NextGen Certified Professionals (NCP) with an average of six years of experience working with NextGen applications. Members of our team also have experience with Allscripts, Epic, Touchworks, GE Centricity, Cerner, and other ambulatory solutions. Santa Rosa provides project management, implementation, workflow analysis, application integration, training, and go-live support for the following NextGen product:
