For Immediate Release

SANTA ROSA CONSULTING SELECTED AS MEDITECH READY IMPLEMENTATION PARTNER BY HARRISON MEMORIAL HOSPITAL

Franklin, Tennessee October 5, 2016 - **Santa Rosa Consulting, Inc.,** through its wholly owned subsidiary InfoPartners, announced today that it was selected by Harrison Memorial Hospital as their MEDITECH 6.1 READY implementation partner. Harrison Memorial, located in Cynthiana, Kentucky, is a regional medical center serving Harrison and surrounding counties. InfoPartners is the only READY partner with more than five 6.x go-lives and a 100% success rate.

"Harrison Memorial Hospital has not used the assistance of consultants in the past and picking a MEDITECH READY Vendor took a lot of thought and research," said Martha Sullivan, Chief Information Officer at Harrison Memorial Hospital. "In the end, after looking at other READY Partners, it came down to pricing and reputation." Ms. Sullivan further commented, "Since we are a small rural hospital it was important that the consultants we picked had experience in this type of environment and could adapt to the multi-hat, less resources and hands on approach found at Harrison. Knowing that another Kentucky Hospital had also picked Santa Rosa and personally knowing some of the other hospitals they have brought up successfully with 6.1 sealed the deal for us."

Santa Rosa's InfoPartners has been proudly serving the MEDITECH market for over 30 years. As READY certified consulting leaders, the company brings exceptional knowledge and extensive hands-on experience with MEDITECH products and solutions. That experience has resulted in successfully delivering over eighty implementations across Magic, Client Server, 6.0 and 6.1 platforms - thirty of which were specific implementations for MEDITECH 6.0 and 6.1. Concurrent with successful outcomes for MEDITECH customers, Santa Rosa and InfoPartners provide a variety of services, including system implementations and upgrades to custom programming, and services tailored to optimize clinical systems.

"Santa Rosa is honored to add Harrison Memorial to our growing list of MEDITECH 6.1 READY implementation client partners" stated Mark Scruggs, President of Santa Rosa's InfoPartners division. He added, "We are proud to provide the community based hospital market with cost effective solutions and the most experienced team in the industry, as our associates have 20 years of healthcare experience on average. Our teams have the knowledge and insights to tailor our unique methods to each client's needs. In partnership with MEDITECH, we've achieved outstanding results as pioneers in the field, such as the first early adopter for MEDITECH 6.0, the first MEDITECH Magic to MEDITECH 6.0 migration, the first multi-facility MEDITECH READY 6.1 implementation, the first large, multi-facility MEDITECH READY 6.1 implementation that also included a non MEDITECH vendor migration."

About Santa Rosa Consulting
Santa Rosa Consulting provides management advisory services and technical consulting expertise across the full range of IT vendor products and systems, delivering solutions specifically designed to address the needs of the healthcare market. Founded in 2008, Santa Rosa Consulting is managed by industry veterans with an average of 20 years of healthcare information technology experience.
